

SOLVECOL

Diluent without Toluene for
Roadmarking Solventborne Paints

For rising & cleaning use

FABRICATION
FRANÇAISE

BENEFITS

Product Characteristics

SOLVECOL is a solvent specially developed for cleaning and rinsing equipment used for the application of toluene-free roadmarking paints and coldplastics.

SAR products are formulated to be ready to use, therefore the use of SOLVECOL to dilute our products is not recommended. SOLVECOL is particularly recommended for carrying out the rinsing procedure when switching from solventborne paint application machines to waterborne paints and vice versa.

SOLVECOL is mainly a product based on esthers and ketones.

A marking material combining performance and sustainable development.

Product certified without toluene or xylene.

Product water miscible.

Metal packaging to limit the risks linked to static electricity.

Effective product with paints without toluene, manual or sprayed cold plastics.

TECHNICAL INFORMATION

Product Application

Highly flammable product.

Do not smoke nearby.

Do not use for hand cleaning.

Physical Characteristics

Density : 0,8 to 0,85 kg/l

Packaging and Storage

5L, 20L, 200L

Only in metal can to avoid risks linked to static electricity

Storage and transport : Dry, frost free place, and away from direct sunlight.

Shelf life : 36 months in unopened packaging (from manufacturing date).

Sécurité & Environnement

Product for professional use only.

Soiled packaging and cleaning products should be discarded according to local regulation.
